**Subject: Current conflict in Ukraine – Sanction and restriction to export in Russia**

Dear Partner,

In reaction to the conflict in Ukraine, the international community has imposed economic sanctions and export restrictions against Russia.

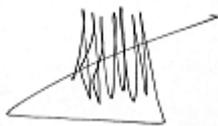

Some of the restrictions preclude Eaton from exporting to Russia products that are manufactured and sold through the distribution channel.

Restrictions under the latest EU regulations also cover indirect sales of goods whether originating in the EU or elsewhere.

As a consequence, in the event your company resell Eaton products to Russia, you are kindly asked to ensure that such sales are suspended until further notice.

Should you have any question, please reach out to your usual contact.

Yours faithfully,

**Anne-Sophie HEBERT**
